

WELCOME TO CLEARWATER

The essential ingredients to create an inspirational kitchen are functionality, great design and faithful reliability. Our company ideal is to combine all three of these elements to provide the perfect sink and tap for you.

With Clearwater Products you can tailor and fine tune your exact requirements by selecting from the wide choice of sink and tap types, designs and materials.

We have divided our sinks between material and installation types and our taps between function and styles so you can quickly navigate our brochure to discover the perfect combination for your cooking, cleaning and design aspirations.

Our staff have extensive knowledge and experience of the kitchen industry and we are always on hand to answer any questions you may have - without you having to run the gauntlet of the automated switchboard!

All our products are sold exclusively through our network of dealers.

Phone us now for your nearest retail outlet.

INSTALLATION

INSET Sink is mounted into the worktop, suitable for all types of worktops.

UNDERMOUNT Sink is fitted to the underside of the worktop, only suitable for solid surface worktops.

APRON FRONT Sink is fitted directly onto the cabinet, only suitable for solid surface worktops.

BOWLS

SOFT RADIUS
Easy to clean traditional styling

SHARP RADIUS
Slick contemporary styling offering many price levels and steel thickness options

SIZING

The sizing is based on ensuring the cabinet is large enough to fit the bowl or bowls.

QUAREX®

The latest generation of Quarex® has been achieved over many years of development and this latest compound which includes 80% quartz has been enriched with silver ions. Silver nano-particles form a protective coating on the surface of the granite with the anti-microbial properties reducing the growth of bacteria and microbes by as much as 98%.

HYGIENIC SURFACE

The advanced anti-bac surface ensures optimum safety when handling food and the fine structure of Quarex® offers dirt-repellent properties.

RESILIENT SURFACE

The robust qualities of Quarex® ensure high resistance to the rigours of the kitchen environment including a high ability to withstand scratches, impacts and high temperatures.

Dirt-repellent effect
The dirt simply runs off.

Odour-free
Leaves the surface free of smells.

Heat-resistant
Not temperature sensitive.

Food-safe
Absolutely safe material.

Hygienic Surface

Made to last
Extremely durable.

Stain-resistant
Food stains cannot stick.

Impact-resistant
Tough and resistant material.

KAMEO SMART QUAREX®

The Kameo sinks feature a 'Smart Ledge' that is designed into each bowl enabling a set of four catering accessories to be employed for chopping, straining and draining. These sinks combine fresh contemporary styling with huge capacity bowls that will swallow up a multitude of jobs.

The D150 principal bowl is noteworthy for its unrivalled generous width of 400mm. This has been achieved by minimizing the strainer bowl with the use of a compact 60mm strainer waste and the extra space gained has been allocated to the main bowl where it is needed most.

BLIZZARD (BL) ASH (AH) JET (JT)

Add colour suffix when ordering
See page 9 for larger colour samples and to learn about the amazing properties of Quarex®.

GEMINI QUAREX®

The **Gemini** steps away from the fashion for minimalist symmetry and instead embraces a soft curved design. The bowl sizes are larger than most sinks and the drainer is particularly smart.

The Gemini would be an ideal choice with Shaker style kitchens. Available in three Quarex® colours.

NOVA QUAREX®

The **Nova** collection of sinks offer a selection of bowl sizes that will suit all kitchen demands, from the Compact N330 secondary/entertainment sink to the huge N780 with capacious dimensions that will swallow up the largest of oven trays and pans. The soft radius corners of the Nova make it an ideal choice for both modern and retro kitchen designs. They can be installed as undermount or inset.

CAPRI QUAREX®

The **Capri** collection comprise three futuristic styled bowls featuring a unique sloping rear ledge housing the overflow outlet. This unusual arrangement looks very sophisticated when combined with narrow radius bowls which emphasize the Capri's crisp lines. The Capri's Ledge Overflow maximizes the depth of water in the bowl before the overflow is employed. The Capri can be installed as an Undermount or Inset.

Stainless Steel Square wastes are supplied with the Capri in keeping with the Capri's ultramodern aesthetics.

QUARSIL®

QUARSIL®

The new generation of Quarsil® has been developed over 30 years and now features substantially improved properties. It is now even easier to clean and has a new intensity of colour.

HYGIENIC SURFACE

The advanced anti-bac surface quality of Quarsil® ensures optimum safety when handling food.

DIRT-REPELLENT EFFECT

The material's fine structure means dirt that could be a breeding ground for bacteria finds it impossible to stick to the surface.

PRODUCT BENEFITS

QUARSIL® Granite sinks are up to 80% natural quartz sand and specially developed for the demands of the kitchen, and the rigours of everyday use.

Dirt-repellent effect
The dirt simply runs off.

Odour-free
Leaves the surface free of smells.

Heat-resistant
Not temperature sensitive.

Food-safe
Absolutely safe material.

Hygienic Surface

Made to last
Extremely durable.

Stain-resistant
Food stains cannot stick.

Impact-resistant

Siena 1.5 in Croma shown with Pioneer tap in Chrome- see page 173

Siena single bowls come in three size options, nine Quarsil® colours to suit most individual requirements and can be installed as undermount or inset. The fine radius corners add to the Siena's cool styling which can be made super cool by choosing a coordinating tap and waste in trend-setting PVD and black finishes.

- The purist's first choice to attain the ultimate minimalist effect
- Easy wipe-down surfaces with no raised edges
- Installation in solid surface worktops only – wood, stone, granite, synthetic

Siena 500 in Polar shown with Amelio Sensor tap in Brushed Brass- see page 162

Siena 1.5 in Onyx shown as inset

SIENA QUARSIL®

The Siena 150 ticks a lot of the boxes on a kitchen designer's wish list; cool contemporary design, sharp radius corners, generous bowl dimensions, and fits within a 60cm cabinet - a perfect solution when space is an issue. Siena bowls can be installed as undermount or inset.

This versatile sink can be fitted as left or right hand main bowl. Added to this, it boasts the widest colour palette available today.

PRODUCT BENEFITS

Heat Resistant: Ceramic is heat resistant to 1200° centigrade - this means pots from the stove and casserole dishes straight from the oven can safely rest on a ceramic sink.

Hygienic: Totally non-porous, the ultra smooth surface is the most hygienic material for sinks and the easiest to keep clean.

Chemical Resistant: Resistant to all household chemicals including neat bleach.

Extreme Hardness: Extremely resistant to impact, the surface is so hard cutlery won't scratch the glazed surface through normal use.

 <p>Dirt-repellent effect The dirt simply runs off.</p>	 <p>Odour-free Leaves the surface free of smells.</p>	 <p>Heat-proof Not temperature sensitive.</p>	 <p>Food-safe Absolutely safe material.</p>
 <p>Hygienic Surface</p>	 <p>Made to last Extremely durable.</p>	 <p>Stain-resistant Food stains cannot stick.</p>	 <p>Impact-resistant Tough and resistant material.</p>

LYDIAN CHEF

The **Lydian Chef** combines smart aesthetics with a carefully considered ergonomic design. The large bowl and outset half-bowl bear the signature of a professional kitchen.

The highest quality finishes have been a priority and special attention is given during the manufacturing process to ensure perfectly smooth surfaces and engineered straight edges. The fired glazed surfaces in white gloss or coloured satin finishes are particularly fine and complete this sink's impressive credentials.

- Slim-edge profile provides a smooth transition to the worktop
- Uniquely practical outset half-bowl for rinsing and draining
- Tap and automatic waste control positioned neatly behind half bowl for clutter-free lines
- Anti-bac, acid and heat resistant surface

MELODY PRO

The Melody's understated design with its minimalist drainer and the thin profile edges harmonise beautifully, resulting in a highly cool and practical sink. As the Melody is one of our premiere quality ceramics the finish quality sets it apart from its peers.

- Slim-edge profile provides a smooth transition to the worktop
- Understated styling provide an ultra-modern aesthetic
- Slender half bowl allows maximisation of main bowl
- Anti-bac, acid and heat resistant surface

Harmony XL in White Gloss shown with Krypton Filter tap in Brushed Brass - see page 154

Harmony MB in Basalt Satin shown with Topaz Twist & Spray tap in Brushed Nickel - see page 166-167

HARMONY

The **Harmony** is a family of four, all sharing smart twin draining channels and distinctive semi-circular tap platforms. These sinks are part of our premiere range and are set apart from other ceramic sinks with their near flawless finish and elegant lines.

The **Harmony MB** is the flagship model for multi-tasking, with a large main bowl and an invaluable half bowl for rinsing and draining.

The **Harmony XL** is the largest of the single bowl collection with a high-capacity bowl and expansive draining area, an ideal choice to handle range cooker size trays and oversize pots.

The **Harmony XW** is mid-size single bowl sink with a drainer waste positioned in a highly useful draining recess, a perfect solution for the disposal of liquids when the bowl is in use.

The **Harmony Compact's** very compact dimensions offer the opportunity to fit a premiere quality ceramic sink in the smallest of spaces and still provide useful size work zones.

The XW sink has a highly useful draining recess, a perfect solution for the disposal of liquids when the bowl is in use.

OPUS

The **Opus** is designed with a distinctive linear tap ledge that compliments its minimalist drainer. Both models share a premiere build quality with sublime glazing that define these sinks. The **Opus Compact** is a great choice when space is at a premium whilst offering useful bowl dimensions. The **Opus XL** has particularly high-capacity bowl and large draining platform thus ensuring this model's high workload status.

- Slim-edge profile provides a smooth transition to the worktop
- Defined linear ledge contains spills and provide a 'dry' platform for accessories
- Compact model fits within 45cm cabinet
- Anti-bac, acid and heat resistant surface

METRO UNDERMOUNT/INSET

The **Metro** collection are a versatile range of bowls that can be installed as either undermount or inset installations. There are three single bowl options to select, choose a stand alone or even a combination of two together. The multi-combined bowl option is particularly smart with extra-slim partition walls providing a more sophisticated look than other ceramic options.

Metro sinks are available in gloss White and matt Sea Mist.

APRON FRONTED

The following pages contain a comprehensive collection of Butler sinks. We offer two main ranges; our 'British Classics' are quintessential vintage designs which are handmade by skilled artisans, while our 'Contemporary Collection' gives a modern tilt to the traditional Butler sink. We also include some practical utilitarian sinks that are ideal for the utility or boot room.

In this installation the sink is fitted directly onto a cabinet with its front fascia exposed. This type of installation is only suitable for solid surface worktops such as Granite, Marble or Wood.

BRITISH CLASSICS

Pages 49 - 61

Our British Classics are a collection of handmade sinks using traditional methods by skilled artisans who pride themselves in reproducing heritage icons.

- Timeless appeal
- Soft sculpture profiles
- Traditional thick walls
- Solid wall construction
- Glazed twice for a beautiful surface finish
- Hand-made by skilled Artisans
- Made in Britain

CONTEMPORARY COLLECTION

Pages 62 - 66

Our Contemporary Collection is a modern interpretation of the classic Butler sink. The use of modern manufacturing techniques has resulted in a slimmer profiled design bringing a layer of modernity to these traditional classics.

- Slim-profile walls
- Light weight construction
- Suitable for modern and traditional styles

UTILITY & LAUNDRY

Pages 66 - 67

Belfast TBE600 shown with Davina Twist & Spray tap in Chrome - see page 170

BELFAST BRITISH CLASSICS

This British Classics **Belfast** faithfully follows the original architectural lines of its forebears, boasting thick softly profiled walls with a classic weir overflow.

KEY FEATURES

- 60mm waste outlet
- Lifetime warranty
- Luxurious, durable, anti-bacterial glaze finish
- Handmade by Master Craftsmen

Belfast Waste Options (85mm Flange)

LEGACY

The **Legacy** Butler sinks combine tradition with modernity, the slimmer wall construction gives this classic design a subtle elegance that contrasts with the more robust architecture of the British Classics shown on the preceding pages. We offer two installation options; without a tap ledge, or with a tap platform suitable for a Monobloc mixer tap.

This option negates the bother of drilling a hole in the work surface.

CAST IRON SINKS

The gorgeous hues of enamelled Cast Iron let you bring your personality into your kitchen decor. Its rich finish and long-lasting presence make a bold statement in your kitchen.

Enamelled Cast Iron sinks are built with lasting beauty and the strength to withstand the test of time. The **Saxon** collection are crafted from at least 80% recycled material, and they come with a lifetime warranty. The manufacturing process ensures that each piece is a genuine, handcrafted original.

Cast Iron is simply the best medium for sinks because of its extreme durability, its high gloss surface maintains a rich finish that resists chipping, staining and denting and its sheer strength enables the creation of beautiful shapes and graceful lines. The authenticity of Cast Iron will complement other traditional kitchen features such as your range cooker.

PRODUCT BENEFITS

Dirt-repellent effect
The dirt simply runs off.

Odour-free
Leaves the surface free of smells.

Heat-proof
Not temperature sensitive.

Food-safe
Absolutely safe material.

Hygienic Surface

Made to last
Extremely durable.

Stain-resistant
Food stains cannot stick.

Impact-resistant
Tough and resistant material.

Clearwater Cast Iron and Ceramic Cleaner
Ref. CLEC200 £14
Removes stubborn metal marks and stains with little effort

SAXON COLLECTION

The **Saxon** collection are a family of three sinks with different bowl configurations that will meet the demands of most households. All share the ability to be installed as insets or undermounts. The high gloss lustre of the sinks set them apart from other sinks and their enduring properties that will ensure long lasting fabulous looks.

KEY FEATURES

- Lifetime warranty
- Luxurious high gloss surface
- Anti-bacterial highly durable surface
- Resistant to chipping, staining and denting
- Hand crafted original pieces

SAXON 175

The **Saxon 175** is extremely versatile with its unique low bowl divider. Everyday washing tasks are carried out in either bowl and when larger items are to be washed, simply raise the water level to fill both bowls creating a single giant bowl. A clever design that is also an excellent water saving device. All Saxon models can be installed as Insets or Undermounts.

STAINLESS STEEL

INSET

Inset

This installation requires the sink to be mounted into the worktop from the above. This installation type is suitable for all types of worktop including laminated chipboard.

Page 74-98

Undermount

This installation requires the sink to be fitted to the worktop from the underside. This installation type is only suitable for solid surface worktops such as Granite, Marble or Wood.

Page 100-121

Apron Front

In this installation the sink is fitted directly onto a cabinet with its front fascia exposed. This type of installation is only suitable for solid surface worktops such as Granite, Marble or Wood.

Page 122-125

Lay-On

Fit directly on to the kitchen cabinet and are not set into a work-top, therefore maximising the wet area. Each sink is supplied with twin tap-holes for either traditional pillar taps or deck mixer style taps.

Page 99

ICONS EXPLAINED

Installation

Handing

Other Details

ICONS EXPLAINED

SilentCote®

Sinks bearing the SilentCote icon are treated with a sound absorbing thermal paint on the underside, reducing noise and increasing durability.

Pre-fitted Seal

Sinks bearing this icon come with a seal already applied to the sink so that the installer does not have to do it by hand.

Sink Finish

Brushed, Silk or Satin

PRODUCT BENEFITS

Stainless Steel remains the most popular medium for kitchen sink production. It's not difficult to realise when you consider it's main attributes:

Heat Resistant

Stainless Steel is highly heat resistant, so much so that hot pans straight from the stove can rest safely on the sink - a highly useful thing when juggling the pasta.

Hygienic

A totally non-porous surface that is easy to keep clean and consequently more hygienic.

Impact Resistant

Stainless Steel is the most forgiving material for impact and is the least likely material to damage your best china or glassware whilst remaining unscathed itself.

Dirt-repellent effect
The dirt simply runs off.

Odour-free
Leaves the surface free of smells.

Heat-proof
Not temperature sensitive.

Food-safe
Absolutely safe material.

Hygienic Surface

Made to last
Extremely durable.

Stain-resistant
Food stains cannot stick.

Impact-resistant
Tough and resistant material.

 Minimum cabinet size: 450 mm
 Waste included: 90mm BSW

VIVA

The **Viva's** most notable features include three bold drainer panels and a slim-edge profile that creates a near flush setting with the work surface. Three bowl options include a catering-size single bowl and a compact version for the smaller kitchen and not forgetting the indispensable 1.5 bowl also playing its role.

Viva V1151 shown with Juno tap in Chrome - see page 172

Monza MN150 shown with Magus 3 Kettle tap in Chrome - see page 134-135

MONZA

The **Monza's** sharper radius bowls are complimented by unique drainer channels that provide rather a dynamic aesthetic. The Monza collection offer three bowl options that should fulfil most busy kitchen demands, particularly the 'workhorse' double-bowl option.

Viva Single bowl and drainer
Ref. V1870 £350

Xeron 100 shown with Mariner Filter tap in Brushed Nickel - see pages 144-145

XERON

These sophisticated hand finished sinks are our most geometrically shaped models and have been planned with aesthetics and practicality in mind. They are manufactured using only the highest quality 1.2mm stainless steel and have been brush polished resulting in a lustrous grained finish. There are four different configurations including a double drainer model which is ideal for particularly high use kitchens.

Zenith ZE150R shown with Titania TI2SS Stainless Steel tap - see page 202

ZENITH

The **Zenith** sinks radiate cool minimalism with strong geometric lines. This family of sinks offer deeply recessed flat drainers that are sloped for easy drain-off. The omission of draining ribs compliment the sharp radii corners and maximise the useable work surface and offer easy to wipe down surfaces. The unusually strong construction has been made possible by using the highest quality 1.6mm thick steel which has been brushed to create a beautiful grained sheen. To further add to this sink's credentials all models have been treated with **SilentCote®** a thermal soundproofing paint.

Presto Automatic Waste - Included with the Zenith

Urban UR660 shown with Zuben Stainless Steel filter tap - see page 159

URBAN

The **Urban** are a very slick range of sinks, the bowls feature 10mm radius corners and smart draining lines enhancing their crisp architectural appearance.

The sinks are manufactured in a 1.2mm steel which has been further reinforced with **SilentCote®**, a special sound-proofing thermal paint (see page 63).

URBAN SMART

The **Urban Smart** sinks are the perfect cook's assistant – custom-fit accessories including strainer colanders and trays can rest on the double-level bowl ledges freeing up hands for food prep tasks such as rinsing vegetables and straining pasta. The top ledge is used for the sliding wooden chopping board and the lower ledge is for the strainer accessories that can also slide for optimum positioning. These bespoke accessories included with the sink truly maximize the Urban Smart's abilities.

The tap-hole employed by the Presto Automatic Waste control can be made available for a secondary tap such as a Filter/Kettle tap or soap dispenser by requesting a manual waste instead of an automatic.

BELLA

The **Bella** boasts a generous size half bowl and has a sharp flat profile edge which appears almost flush to the worktop.

UNDERMOUNT

We offer a huge choice of stainless steel undermount sinks, from soft form to zero radius bowls and compact to capacious; you can be assured you will find the perfect solution for your needs. Also, amongst the undermount pages you will see our Smart series which offer fitted accessories to broaden versatility.

This installation requires the sink to be fitted to the worktop from the underside. This installation type is only suitable for solid surface worktops such as Granite, Marble or Wood.

The **Jazz** offers amazing value for money when you consider its excellent credentials. Constructed from a robust 1.0mm stainless steel and treated with **SilentCote®** for added hushed tones when in use. Fine radius corners for an ultra-contemporary aesthetic, a brushed grained finish with smart draining lines on the bowl floor to aid rapid draining.

The decorative graining extends to the normally unseen rim which means all models can be installed in both undermount and inset formats as well.

STARK SMART UNDERMOUNT/INSET

The **Stark Smart** sinks have an ultra-contemporary style with zero radius bowls. They have been designed with the cook in mind with built-in accessory ledges which house custom-fit accessories. These include a wooden chopping board which is supplied with each sink and an optional strainer colander and strainer tray. These sit snugly on their ledges freeing up both hands for tasks such as rinsing vegetables and straining pasta.

The Smart accessories have transformed the Stark from a humble sink into a clever workstation.

VOLTA UNDERMOUNT/INSET

The **Volta** has fine radius corners and smart draining lines creating a very modern statement. There are six options to choose from, including two versatile 1.5 bowl models which feature a unique slim bowl divider reinforcing the Volta's sophisticated design.

The Volta is manufactured in 1.0 thick steel which has been treated with **SilentCote®** to enhance its robust qualities and provide hushed tones when in use.

VOLTA PVD UNDERMOUNT/INSET

The **Volta PVD** range is our latest elegant range of bowls that can be fitted in both under-mount and inset applications. The bowls have crisp 5mm radius corners and stylish pressed draining-lines. They are all available in Brass, Bronze and a very chic Black finish (see over page). These special finishes are created using a PVD process that provides an extremely resilient surface. The Dura-Brushed finish is a unique random brushed effect, providing a rich patina that disguises scratches and prolongs its original looks.

The Volta 1.5 model features a slick, ultra-slim bowl divider that maximises the bowls capacity whilst retaining an overall compact dimension, ensuring that it fits into 60cm wide cabinetry.

All models have been constructed in 1.0 mm stainless steel and coated with **SilentCote®** on the underside for increased sound-proofing.

VOLTA PVD UNDERMOUNT/INSET

The **Volta PVD Black** is black - not compromised tones of dark grey that is usually on offer. This pure colour creates a very sophisticated presence in the kitchen and is certainly statement making. The PVD properties add a very resistant surface and the Volta Black has also been treated with Nano technology. This has created a uniquely smooth surface which is not only dirt repellent but is extremely hygienic.

These sleek sinks are fabricated in 1.0 steel and have been treated with **SilentCote®** to increase the robustness and add hushed tones when in use.

The 1.5 bowl model has a very slim bowl divider adding a very contemporary aesthetic whilst maximising the bowl dimensions.

NANO COATING

Nano Coating is the process of applying an ultra-thin surface layer which gives the product a mechanically flat surface. Which repels dry particles, water, oil, and dirt. Resulting in a product that is dirt repellent and more hygienic, easier to clean and more resistant to scratches and chemicals. Other benefits include a reduction in grease and finger marks.

Properties

- Dirt Repellent and Hygienic
- Hydrophobic
- Chemical Resistance
- Ultraviolet Resistance
- Reduces Grease and Finger Marks

SALSA PVD UNDERMOUNT/INSET

The **PVD Salsa** undermount/inset bowl collection are our most economical range of PVD sinks. Choose from two single bowl size options or a versatile 1.5 model. The Brass or Copper colour choices add a warm glamorous effect and the durable PVD qualities provide a higher level of scratch and abrasion resistance. The **SilentCote®** sound proofing compound has also been applied to the underside for added hushed tones.

INFINITY SMART

The **Infinity Smart** Butler sinks create a lustrous focal point in the kitchen, the architectural aesthetics are enhanced by the slender front apron which disguises the true depth of these sinks adding to their sophisticated appearance.

All models have a unique integrated ledge to accommodate an essential range of accessories that maximize the Infinity Smart's abilities. Please note the 1.5 bowl model has low partition wall which allows both bowls to be flooded to create a larger washing area.

This filter has a 6 month life span and a capacity of 3800 litres.

Filtered water is untainted by the taste of heavy metals, limescale and chlorine.

NSF REG4 Approved

Magus, Hotshot & Nexus Kettle Filter (12 month)
Ref. F12C1 £112

This filter has a 12 month life span and a capacity of 7600 litres.

Filtered water is untainted by the taste of heavy metals, limescale and chlorine.

WRAS Approved

TAPS CHOICES

FINISHES

WATER PRESSURE - IDENTIFY YOUR SYSTEM

To be sure you get the best performance from your tap you need to identify the plumbing system in your home to be able to determine the water pressure there.

Use the following information as a guide to help you to do this, it is recommended that you get the opinion of a professional tradesman who can check the pressure with a pressure gauge.

Gravity Fed (Low pressure) Systems

- Cold water storage tank in loft
 - Hot water cylinder in airing cupboard
 - Hot water pressure is calculated by measuring the height from the storage tank to the tap
- Example
 1M drop = 0.1 bar pressure
 2M drop = 0.2 bar pressure
 5M drop = 0.5 bar pressure

Boosted Gravity Fed Systems

- Cold water storage tank in loft
 - Hot water cylinder in airing cupboard
 - Hot water pressure is determined by a separately fitted pump (refer to manufacturers specifications)
- Usual pressure 1-3 bar

Combination Boiler Systems

- A combi boiler delivering hot and cold water on demand
 - No storage tanks
 - No shower pump
 - Hot water pressure is dictated by the mains pressure and power of the boiler
- Usual pressure between 1 and 1.5 bar

Mains High Pressure Systems

- Unvented cylinder with expansion vessel (eg 'Megaflo')
 - No cold storage tanks
 - No shower pump
 - Hot water pressure is dictated by mains pressure
- Usual pressure between 2 and 3 bar

All taps are shown with a minimum operating pressure symbol as below. Use this symbol to select the correct tap for your water system; for example if you have a gravity fed system with a 5 metre drop you will have 0.5 bar pressure and you should choose a minimum 0.5 bar tap or lower. If you have a high pressure system for example 3 bar you can choose any of our taps.

TAP ICONS - EXPLAINED

Throughout the following Tap Sections you will see these icons next to products where relevant.

The Cascade SLC aerator offers anti-limescale features, with a rubber face to prevent scale amalgamation, simple to clean with just a gentle rub.

Cold Start Energy saving cartridge means when the lever is in the vertical position, it only dispenses cold water and not mixed. Forward rotation avoids the lever hitting the splashback.

Pull-out Aerated Spray Increases operating range of the tap supplying a single aerated flow.

Pull-out Dual Flow Spray Increases operating range of the tap and provides easy switching from aerated flow to needle spray.

Dual Flow Keeps the flow of hot and cold water separate in the tap Spout.

Minimum Operating Pressure

Maximum Spout Swivel

Professional Dual Flow Spray 360° flexible spout with easy switching from aerated flow to needle spray.

Professional Single Flow 360° flexible spout with single aerated flow.

Twist & Spray A simple twist of the spout flange will change the water from aerated to needle jet flow.

WARRANTY

We offer a 5 year warranty from date of purchase on all working parts and valves for our taps, decorative surfaces are guaranteed for 1 year from purchase date providing care instructions have been followed and in particular no scouring agents have been used.

PACKAGING

All our taps are supplied in robust boxes with protective foam individually protecting the tap and its separate parts, thus ensuring your tap arrives complete and in perfect condition.

KETTLE TAP

SPEED

No more waiting for the kettle to boil - 98° hot filtered water is always instantly available. It takes up to 5 minutes to boil a litre of water using an electric kettle, it takes zero minutes using a Kettle tap.

TASTE

The water before entering the boiler is filtered to remove impurities, resulting in fresh odourless 98° hot water for superior tasting drinks.

WATER SAVING

You only dispense the precise amount of hot water you need, so you save on water and energy consumption. All our Kettle Tanks have a built in filter alert that lets you know when the filter needs replacing.

SAFETY

All our Kettle taps come with insulated spout technology and child-safe controls.

CLEAR THE DECKS

Declutter your work surfaces by ditching your kettle, all your boiling water requirements are fulfilled with a Kettle tap.

BENEFITS

Temperature Control

Ten precise temperature settings between 45°C and 98°C

FILTER CARTRIDGE

The filter cartridge included has a 6 month life span and a capacity of 3800 litres.

Replacement Cartridges
Ref. F6C1 £72 - WRAS Approved

An optional filter with a 12 month life span is also available with a capacity of 7600 litres.

Ref. F12C1 £112 - WRAS Approved

- **4 Functions** - domestic hot, domestic cold, 98°C filtered water and cold filtered water.
- **Press & Hold or Hands-Free Kettle operation** - the Magus 4 is programmed to dispense water by pressing and holding control or simply press twice for hands-free mode.
- **Child safe operation** - advanced electronic control with LED illumination denoting hot function.
- **Cool touch spout** - centrally insulated 98°C channel ensuring spout remains safe to touch.
- **Advanced filtration** - protects the boiler from limescale formation, removes contaminants and improves taste and odour of the water to achieve the perfect hot and cold drinks.

KETTLE CONTROL

1 LED glows Blue - indicates the child lock is on.

2 Press control for 3 seconds to unlock - LED glows red and flickers.

3 Press control again and hold to dispense 98°C water - LED glows constant red.

4 Release pressure on control to cease flow - LED glows blue after 10 seconds, child lock on.

5 Hands-free control - Press control twice to dispense 98° filtered water - auto switch off after 60 seconds (approx 2 litres). To stop continuous flow press control again.

HOTSHOT ^{kettle}

The **Hotshot 1** is a compact filtered hot water tap which can be set alongside your main tap or installed with a secondary sink creating a fantastic entertaining area.

The Hotshot 1 can also be fitted with a font extending its application away from the kitchen, for example try fitting in the home office for that instant coffee fix.

The **Hotshot 2** brings even more to the party by not only dispensing 98°C super-hot water but also great tasting, cold filtered water, making this little tap the perfect choice for entertaining.

LONGDON 4

The **Longdon** hides some very smart tech behind its softly sculptured exterior - its 4 in 1 technology is controlled by two elegant ceramic levers, these dispense 98 degree hot and cold filtered water for drinks and cooking as well as a standard domestic hot/cold supply. The curvy aesthetic of the Longdon allows this versatile tap to be at home in both modern and traditional settings and with its ceramic levers make a perfect alliance with fireclay sinks. It is available with an incredibly useful matching handspray, see page 207 for more info.

FILTER TAPS

TAP INTO HEALTHIER GREAT TASTING FILTERED WATER

The filtered water tap is fast becoming a common feature in today's modern kitchen.

The high performance filters transform standard tap water into fresh clean tasting drinking water so efficiently that the filtered water cannot be distinguished from bottled mineral water.

The cost saving is considerable compared to purchasing bottled water and also saves time and energy carrying heavy bottles from the supermarket. Using a filtered tap is also environmentally friendly thus avoiding the disposal of endless plastic bottles.

FILTER TAP

BENEFITS

TASTE

The Pure Filter removes impurities to give the water a great taste to rival bottled mineral water. The filtration transforms tap water giving a pure untainted taste.

HEALTH

Drinking filtered water with all impurities removed and the healthy minerals left adds to the health-giving properties compared to standard tap water.

CHILLED

Our chilled units can further add to the pleasure of filtered refreshing water, simple to fit under the sink giving constant chilled/ filtered water.

Pure Chiller 100

ENVIRONMENT

Aside from the inconvenience of carrying heavy bottles home from the supermarket, there is the added benefit of not adding to the growing plastic waste epidemic that is choking our planet.

ECONOMY

Why spend a fortune on bottled water when equally good tasting water is simply on tap and virtually free to use.

APPLIANCES

Prolong the life of your steam iron and kettle by filling with filtered water to avoid limescale build-up.

FILTER REPLACEMENT

To maintain a supply of great tasting water it is important to replace the filter after 4000 litres have been used, we supply, with each tap, a Pure FlowPro digital reader which will remind you when it's time to change. It is easy to replace the filter by a simple twist off and twist on process, no plumbing skill required!

P6C1 Filter

Pure FlowPro water meter

FILTER

For chilled filtered water see our **Chiller** on page 159.

The **Pure FlowPro** is a digital Filter replacement reminder system with live flow rate.

Included with all Filter Taps.

The Filter

Each Clearwater filter delivers 3800 litres of filtered water at a fraction of the price of bottled water. Untainted by the taste of heavy metals, limescale and chlorine results in fresh, great tasting water straight from the tap.

FILTER pure[®] TRI-SPA

The **Tri-Spa** range of taps are based on the original three lever control design, each lever operates its own waterway and is delightfully simple to operate. The domestic hot and cold are in the usual side positions and the filtered water is controlled by the central lever. All models have separated filtered water conduits to avoid any mixing with unfiltered water.

There are three design choices; the **Stella** for crisp minimalism on these pages, the **Eclipse** for soft flowing lines and the **Krypton** for a more nostalgic style on the following pages.

Brushed Brass PVD

For chilled filtered water see our **Chiller** on page 159.

PURE CHILLER 100 pure[®]

For superior tasting water, the **Pure Chiller 100** is an additional feature that can be combined with any of our filter taps. It has a patented silver turbo clean system which generates a water vortex on the internal walls whenever water is dispensed, so preventing biofilm formation. In addition, the sealed stainless steel cooling chamber is welded together using silver, a material well known for its antibacterial properties.

Thus providing pure crisp chilled water on demand directly from your tap.

- Icebank system for superior chilling
- Simple & quick installation
- Compact design
- Up to 15 litres per hour of chilled water - between 3° and 10° C
- 1.5 bar minimum
- Width 26cm
Depth 23.5cm
Height 40.7cm
- 2 year warranty

Ref. Pure100 **£799**

SENSOR TAPS

Sensor taps free-up your hands so you can speed through daily chores such as washing, cleaning and food prep whilst maintaining a more hygienic environment. No need to touch the tap when your hands are full or you have been prepping raw meat - just a simple wave of your hand or an object such as a pan or a utensil will activate the sensor to turn the water flow on and a further movement within 10cm of the sensor will turn it off.

These state-of-the-art taps are an invaluable kitchen assistant that will create a more germ-free work zone.

- **INTELLIGENT MOTION TECHNOLOGY**
Reliable touchless on/off operation
- **PRECISE ACTIVATION ZONE**
Utilises state-of-the-art sensor to prevent false activations
- **DUAL OPERATION**
Optional manual and Touchless control
- **BATTERY OPERATED**
No power supply necessary

- **PVD COATING**
Helps to withstand surface damage and Nano technology provides a more hygienic surface
- **Energy saving cold-start control**

Galex Filter
See the filter version of the Galex tap on page 148.

GALEX MOTION

The **Galex Motion** touchless tap combines beautiful design and smart technology which enables you to speed through tasks at the sink without having to touch the tap thus avoiding the spread of germs. The Motion™ technology will respond by a simple movement of a hand or object. The sensor operates within 10cm to avoid unintentional activation.

TWIST & SPRAY®

These taps are fitted with the unique **Twist & Spray** aerator which provides two flow types that can be changed with a simple twist of the flange. The pleasing high quality movement clicks from a non-splash aerated flow to a needle jet-spray that is ideal for jobs such as rinsing plates and food preparation. The needle-jet mode can also generate detergent bubbles far more easily than an aerated flow, particularly in today's water regulated taps.

The Twist & Spray has greatly widened the standard tap's range of abilities in one simple twist.

Chrome

PULL-OUT PIONEER

PIONEER PULL-OUT

The design of the **Pioneer Pull-Out** has been inspired by the aesthetics of our industrial past with its use of knurled components and steam valve style lever. The pull-out spout adds to this tap's versatility with its switch controlled flow options providing aerated water for filling and needle jet spray for rinsing.

Aerated Spray

The **Pull-Out Spray** is an incredibly useful tool for all manner of jobs, from rinsing off crockery prior to the dishwasher, rinsing veg and salads and cleaning down the sink.

Once you have one you will never be without one again!

They make a particularly valuable kitchen aid when partnered with non-pull out and professional taps when there is no facility for a directable flow.

There are two flow types at cold mains pressure:

Aerated - ideal for vessel filling and gentle rinsing of delicate food.

Needle-Jet - for rinsing the crockery prior to dishwasher, food preparation - washing salads and rice etc and rinsing around the sink bowl and drainer after use.

- 60cm working range with auto-retract hose
- Twin flow types: Aerated, Needle-Jet
- Auto lock for hands-free operation
- Mains pressure cold flow – variably controlled
- Five finishes perfectly matched with the Clearwater modern and traditional ranges

PULL-OUT SPRAYS MODERN & TRADITIONAL

TRADITIONAL

These traditional models are a nostalgic collection of high quality reproduction period taps. All these taps combine their historical aesthetics with the modern technology used with their Modern cousins. Each tap is available in a choice of finishes as illustrated on these pages.
